Phase 1 works were funded by Fareham Borough Council.

**The work completed included:**

- Re-nourishment of the beach with 4,000 tonnes of shingle imported by road.

- This will help protect the fragile seawall in the coming winter and replace beach material lost in previous winter storms.

- Repairing 10 FBC owned groynes involved replacing 460m of timber planks and repairing 38 piles.

- This will improve beach material retention and help protect the sea walls.
