

When will the work happen?

Programme of works

Subject to final approval of all relevant licences and consents, construction work is expected to commence in April 2017 and will be completed by October 2019.

No construction works will take place over the winter period due to environmental restrictions, however soft landscaping works will be undertaken during this time. The coastal path will be re-opened between October and April during each year of the works.

Site Construction

The majority of construction work will be undertaken during normal working hours to minimise disturbance to the community.

Deliveries of material and equipment will be managed and restricted to avoid busy times.

Due to the tidal working window, it is likely that some construction will need to take place outside of normal working hours, including weekends. To reduce disturbance to residents, the following restrictions will be applied:

- Evening working - all works will be outside a 100m radius of the nearest house. Noisier works, such as piling, will be kept outside a 200m radius from the nearest house.
- Night working - all works will be kept outside a 200m radius of the nearest house. Noisier works, such as demolition, will not be permitted during this time.

Such occurrences will be closely managed by the project team and advanced notification will be given to local residents.

Normal working hours:

Monday to Friday: 7.00am–7.00pm

Evening working hours:

Monday to Friday: 7.00pm–11.00pm

Night working hours:

Monday to Friday: 11.00pm–7.00am

Piling:	Demolition:
The new seawall will have steel pile foundations. These will be driven using vibration to reduce disturbance.	In order to build the new defences some of the existing structures will need to be removed.

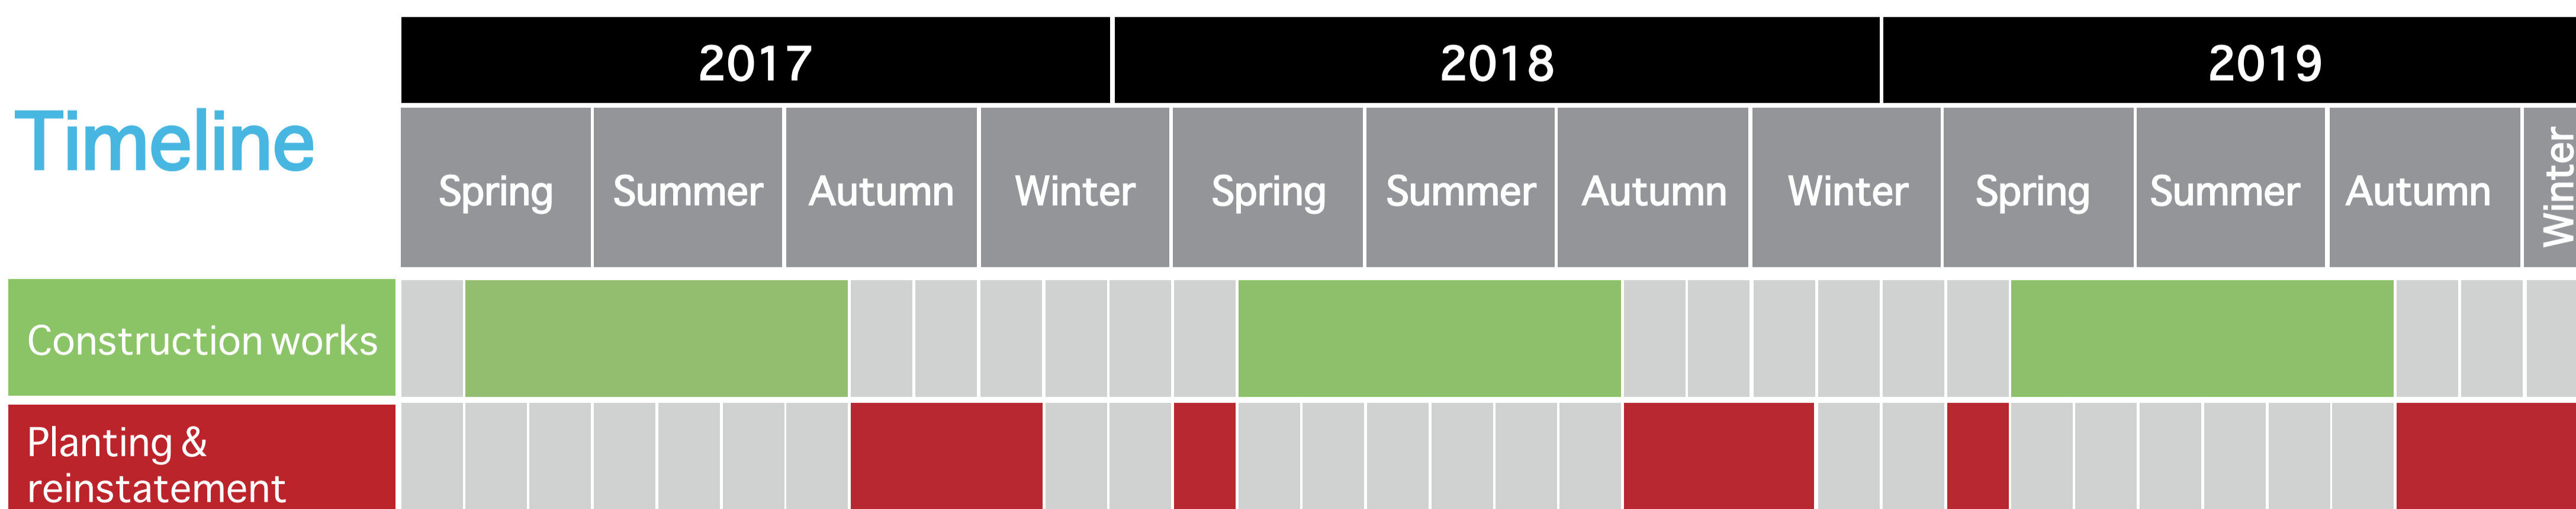

North Portsea Island Construction Phasing

Construction works have been split into distinct phases which will be delivered over a period of seven years.
